## Make a Difference in Biotech and in the World

IFBiC's mission is to transform information into knowledge that becomes the basis for harmonized, science-based decision making. Better decision making leads to a healthier, safer world.

Be a leader in identifying and resolving important issues in agricultural biotechnology. Achieve more with less by pooling human and financial resources and by building lasting partnerships.

Gain insight - and share insight - around the globe by becoming a member of IFBiC. Help select the scientific topics we address; topics that are important to you, our partners, and the public.

*ILSI-affiliated authors are prolific, generating a large number of published scientific papers [on biotechnology] each year.*

— Earth Open Source, 2011

**We focus on Science  
Collaboration  
Outreach  
Capacity Building**
