ILSI

The International Life Sciences Institute (ILSI) is a non-profit, worldwide foundation established in 1978 to advance the understanding of scientific issues relating to nutrition, food safety, toxicology, risk assessment and the environment. By bringing together scientists from academia, government, industry and the public sector, ILSI seeks a balanced approach to solving problems of common concern for the well-being of the general public. ILSI is affiliated with the World Health Organization (WHO) as a non-governmental organisation and has specialised consultative status with the Food and Agriculture Organization of the United Nations (FAO). ILSI is headquartered in Washington, D.C., USA. ILSI branches include Argentina, Brazil, Europe, India, Japan, Korea, Mexico, North Africa and Gulf Region, North America, North Andean, South Africa, South Andean, Southeast Asia Region, the Focal Point in China and the ILSI Health and Environmental Sciences Institute (HESI). The branches are funded primarily by their industry members. Today ILSI enjoys the support of around 300 companies and a network of scientists throughout the world. A list of industry members worldwide can be found on the website <http://www.ilsi.org>.

ILSI Europe

ILSI Europe was created in 1986 to focus on the specific needs defined by the Institute's European partners.

The main goals of ILSI Europe are to:

- play a catalytic role in identifying and addressing critical scientific issues related to nutrition, food safety and the environment.
- provide coherent scientific answers to issues of public interest through scientific programs that are of mutual concern to industry, government and academia.
- support an active publication programme for the dissemination of scientific information to the broadest possible audience including the scientific community, international organisations and regulatory agencies.

To address these issues, ILSI Europe's members initiate projects, which are managed by specific task forces. Task forces accomplish their goals through activities such as expert groups, European Commission projects, workshops, conferences and publications.

ACCEPTABLE DAILY INTAKE

An Analysis of the Possibility for Health Implications of Joint Actions and Interactions between Food Additives

Written by J.P. Groten *et al.* Published in *Regulatory Toxicology and Pharmacology*, Volume 31, Number 1, February 2000, Academic Press. ISSN 0273-2300/93.

The Acceptable Daily Intake – A Tool for Ensuring Food Safety

ILSI Europe Concise Monograph Series. Written by D. Benford. Published by ILSI Press. 2000. ISBN 1-57881-091-4.

Translations available in:

Russian. Published by ILSI Press. 2004. ISBN 1-57881-148-1.

Japanese. Published by ILSI Press. 2003. ISBN 1-57881-154-6.

Significance of Excursions of Intake above the Acceptable Daily Intake (ADI)

ILSI Europe Report Series. Report of a workshop held in April 1998 organised by the ILSI Europe Acceptable Daily Intake and Food Chemical Intake Task Forces. ISBN 1-57881-053-1.

Full proceedings published in:

Regulatory Toxicology and Pharmacology, Volume 30, Number 2, October 1999, Part 2 of 2. Academic Press. ISSN 0273-2300.

Applicability of the Acceptable Daily Intake (ADI) to Infants and Children

ILSI Europe Report Series. Consensus Report of an ILSI Europe workshop prepared under the responsibility of the ILSI Europe Acceptable Daily Intake Task Force. 1997.

Full proceedings published in:

Food Additives & Contaminants, Volume 15, Supplement. Editors: B. Clayton, R. Kroes, J.C. Larsen and G. Pascal. 1998. ISSN 02-203X

Human Variability and Noncancer Risk Assessment – An Analysis of the Default Uncertainty Factor

A.G. Renwick and N.R. Lazarus. Published in *Regulatory Toxicology and Pharmacology*, 27, 3-20 (1998), Academic Press. 1998. ISSN 0273-2300.

The Use of an Additional Safety Factor or Uncertainty Factor for Nature of Toxicity in the Estimation of Acceptable Daily Intake and Tolerable Daily Intake Values

Written by A.G. Renwick. Published in *Regulatory Toxicology and Pharmacology*, 22, 250-265. 1995. ISSN 0273-2300/95.

The Intake of Chemicals Related to Age in Long-Term Toxicity Studies - Considerations for Risk Assessment

Written by N.B. Lucas Luijckx, G.N. Rao, E.E. McConnell, G. Würtzen and R. Kroes. Published in *Regulatory Toxicology and Pharmacology*, 20, 96-104. Academic Press. 1994. ISSN 0273-2300

An Analysis of the Risk of Exceeding the Acceptable or Tolerable Daily Intake

Written by A.G. Renwick and R. Walker. Published in *Regulatory Toxicology and Pharmacology*, 18, 463-480. 1993. ISSN 0273-2300.

Scientific Evaluation of the Safety Factor for the Acceptable Daily Intake

Re-evaluation of Current Methodology of Toxicity Testing Including Gross Nutrients

No longer available

Edited by R. Kroes & R.M. Hicks. Published in *Food and Chemical Toxicology* Vol. 28 No. 11. Pergamon Press. 1990. ISSN 0278-6915.

ALCOHOL

Meta-Analysis of the Relationship Between Alcohol Consumption and Coronary Heart Disease and Mortality in Type 2 Diabetic Patients

L.L.J. Koppes, J.M. Dekker, H.F.J. Hendriks, L.M. Bouter, R.J. Heine. Published in *Diabetologia*. 2006, 49:648-652.

Moderate Alcohol Consumption Lowers the Risk of Type 2 Diabetes – A meta-analysis of prospective observational studies

L.L.J. Koppes, J.M. Dekker, H.F.J. Hendriks, L.M. Bouter, R.J. Heine. Published in *Diabetes Care*, 2005, Vol. 28, Number 3, pp.719-725.

A Comparison of the Alcohol Attributable Mortality in Four European Countries

Written by A. Britton, E. Nolte, I.R. White, et al. Published in *European Journal of Epidemiology*, 2003, Vol. 18, No.7 pp.643-651.

Trends in Mortality Attributable to Current Alcohol Consumption in East and West Germany

Written by E. Nolte, A. Britton, and M. McKee. Published in *Social Science & Medicine*, 2003, Vol. 56, No.7 pp.1385-1395.

Mortality in England and Wales Attributable to Current Alcohol Consumption

Written by A. Britton and K. McPherson. Published in *Journal of Epidemiology and Community Health*, June 2001, Vol. 56, No.6 pp.383-388, *British Medical Journal Group*.
