

Human Diet and Endocrine Modulation

1998

_Title: Human Diet and Endocrine Modulation

Editors: George E Dunaif, PhD, Stephen S Olin, PhD, Joseph Scimeca, PhD, and John A Thomas, PhD

Published by ILSI Press

Abstract: Human Diet and Endocrine Modulation gives readers an overview of how substances in the diet may influence the endocrine system. Expert contributors discuss basic scientific understanding of mechanisms of action; methods of measuring; and dietary sources and potential effects of endocrine-active substances; as well as approaches for characterizing risk.
